

TOUGH ON DIRT

## MULTI FLOOR CLEANING. THE AUTOMATIC XP10

The SEBO AUTOMATIC XP10 small in size offers easy and effective floor care automatically: A computer control system monitors performance and adjusts the brush height to the optimum floor setting, ensuring the best performance at all times on all floors - whether on smooth floor or high pile carpet. Featuring our anti-allergy S-Class-Filtration, the AUTOMATIC XP10 is ideal for use in environments where high Indoor Air Quality (IAQ) is paramount.

# SMALL IN SIZE - BIG ON CLEAN!

## THE SEBO AUTOMATIC XP10

From smooth hard floor to high pile carpet: The niche SEBO AUTOMATIC XP10 is the intelligent all-rounder for any type of floor. The brush is automatically set to the optimum floor setting. Low handle weight and electric brush roller assures easy vacuuming. Integrated hose with telescopic tube is conveniently located for hard to reach areas plus on-board Accessories for above the floor cleaning. Maintenance of the machine is quick and easy with minimal downtime with access to the brush roller, hose and filters within seconds. Stores neatly on housekeeping trolleys.

**01 Optimum performance automatically**  
A powerful on-board computer measures brush action and adjusts the cleaning head for the best results, completely automatically, whether carpet or hard floor. Performance is optimised even on the lowest setting with a sealing strip behind the brush gathering even the finest dust to the suction flow.

The compact 31cm working width vacuums in between chair legs in one pass and stores neatly on housekeeping trolleys.

### 03 Flat design

The SEBO AUTOMATIC XP10 can even work when completely flat. With its low-profile design, it makes it easy to clean under furniture.

### 04 Tool-free change of the brush

Very quickly and without tools the brush can be removed to clean away hair and threads.

Changing a worn out brush is that easy too.

### 02 High Performance Filtration

The SEBO AUTOMATIC XP10 is equipped with S-CLASS filtration: a three-stage filtration system consisting Ultra filter bag, pre-motor Microfilter and exhaust filter. A sealed filtration system, the XP10 removes a minimum of 99.97% of allergens of 0.3microns with hygienic debris disposal.

### 05 Functional wand

With the wand with integrated extending hose you reach a range of 2.60 m. The integrated equipment (upholstery nozzle and crevice tool) can easily be fitted on the wand or the hose.
